# HONEYWELL PRINTER EDGE™

Honeywell Printer Edge is a comprehensive printer platform designed to empower users across applications.

The smart, connected performance of Honeywell Printer Edge gives businesses the simplicity of a single operating ecosystem with easy setup and quality output. Honeywell Printer Edge is also compatible with various drivers and has built-in features for extensive control over operations and processes. At Honeywell, we carefully designed this solution for ease of use, high performance, enhanced security and with a single software toolkit for better, in-depth visibility of printer networks.

## INDUSTRY BACKGROUND

From shopping malls to warehouses and distribution centers to hospitals and more, businesses struggle with inaccurate and unoptimized printing. Some challenges need new solutions:

- Healthcare organizations** face increasing demands to print labels for sample testing, management of medicinal inventory and heightened quality control demands throughout all touch points of patient care.
- Distribution centers and warehouses** need to perform at peak levels as global supply chain constraints pose threats to process and productivity. Honeywell Printer Edge can provide operations managers with real-time alerts regarding printer health and output status, to help them stay ahead of any printer challenge.
- Manufacturing** sectors face a unique set of challenges as we move into a complex future. From data breaches to cyberattacks, manufacturers have to be agile and resilient to withstand disruption. The
- heightened security that Honeywell Printer Edge offers, businesses can be assured that invaluable data is protected and available on demand.
- Transportation and logistics** businesses are handling an increase in home deliveries, greater return inventory and a growing customer desire to have contactless interactions. Honeywell Printer Edge helps you easily integrate printer apps to add label and receipt printing solutions.
- Retail** printing workflows with Honeywell Printer Edge enable store associates to provide heightened customer service through curbside click and collect, online order picking, mobile check-out, inventory return and labeling for a seamless shopping experience.

Promoting accuracy, security and visibility in a simple user experience can help you deliver quality results and protect customer success in several industries.

## GIVE YOUR PRINTER THE RIGHT PLATFORM

Extensive installation, implementation and training for traditional printing platforms can take valuable time away from operations.

Honeywell Printer Edge leverages connectivity to help increase efficiency across these key pillars:

### EASY TO USE

Simple integration and a consistent user experience.

- Remotely connect software apps and effortlessly integrate your printer fleet
- Intuitive interfaces allows users to manage multiple printers without having to learn extensively about each printer
- Centralized printer management and remote troubleshooting

### HIGH PERFORMANCE

Increased accuracy and reduced errors for improved performance.

- High print speeds help users keep up with increased demand for printer productivity
- Accurate printing means less time correcting erroneous labels and barcodes to stay on schedule
- Honeywell Operational Intelligence optional software provides real-time diagnostics on printer health, allowing users to address issues before they impact productivity

## HONEYWELL PRINTER EDGE

### ENHANCED SECURITY:

Strengthened printer security and less vulnerability.

- Data encryption helps keep information secure from cyber attacks
- Protect sensitive and IoT information
- Configurable user access allows users to secure specific functions and assign roles

### SINGLE SOFTWARE TOOLKIT:

Helps users achieve in-depth visibility of their printer network.

- Centralized dashboard helps reduce downtime during new user training
- Automated processes reduce the need for manual IT intervention
- Dashboard allows for consistent IT navigation during setup and troubleshooting

## INDUSTRIAL PRINTERS:

### MODELS

For industry-leading performance, the Honeywell industrial printer label family is the smart choice. Recognized for durability and reliability, our industrial label printers minimize label errors and offer easy programmability, RFID technology and advanced networking connectivity and security. Honeywell industry printers also offer barcode verification and can minimize barcode errors on each print. Our industrial printers can handle anything from commercial, light-volume needs to rugged, around-the-clock printing performance.

## DESKTOP PRINTERS:

### MODELS

Honeywell desktop barcode printers cover economical, low-volume needs to rugged, industrial-strength printing applications. Highly intuitive, flexible and smart, our desktop printers are the clear choice for a wide variety of light-duty label, ticket and tag printing applications in a range of configurations.

## PRINTING ACROSS APPLICATIONS

We understand that a one-size-fits-all solution won't always yield the best results. Our product offerings include an extensive range of industrial, desktop and mobile printers with built-in and upgradable software features for a variety of applications and uses that can be tailored to a user's needs and preferences.

## UPGRADE TO UNCOMPLICATED

We take printing personally. Helping reduce downtime, increase security, productivity and flexibility, take control and command of one printer, or an entire fleet, is easy with Honeywell Printer Edge. With our technical expertise and reliability, it's our job to give users access to advanced interoperability that can help maximize performance potential of entire printer networks with versatility, adaptability and end-to-end benefits.

# SIMPLE SOLUTIONS FOR COMPLEX WORK

It's time to make functionality, flexibility and productivity a priority. Take control of your operations with a reliable and versatile printer that helps ensure product quality and delivers predictive analytics for better interoperability. Our line of desktop, industrial, and mobile printers includes:

### PC45 DESKTOP PRINTER:

Powerful performance, reliable connectivity, and easy integration to help tackle rapidly changing everyday work environments. Enterprise-level ruggedness and a large touch screen display, the PC45 series desktop printers bring reliability in a compact design.

### PM45 / PM65 INDUSTRIAL PRINTER:

This series of printers are designed for high quality label printing and offer high-precision and high-volume printing. Reliable performance help enterprises enhance automation and intelligence in manufacturing and supply chain management for high operating efficiency.

### RP2f / RP4f MOBILE PRINTER:

The RPf series mobile printer comes with a powerful CPU and smart power management that allows smooth, continuous operation and easy integrated device management. Users can work efficiently with less media reloading, battery swaps and downtime.

Our comprehensive product line with printers of different sizes and various specialties can accommodate complex designs and customization, as well as help optimize a business's workflows from start to finish.
