ēlo | **EPSON**

Boost back-of-house performance with Elo + Epson TrueOrder™ KDS.

The flexible Elo I-Series with Linux touchscreen computer and Backpack® Linux PC are now available with Epson's TrueOrder™ KDS software, delivering an intuitive, out-of-the-box kitchen display system designed to enhance efficiency and streamline order management.

KDS Benefits

- ✓ Ready-to-go KDS solutions (KDS software included with select Elo hardware)
- ✓ No recurring software or subscription fees (one-time license per station)
- ✓ Customizable views for kitchen, expediter, and customer-facing stations
- ✓ Supports up to nine stations for optimized workflows and scalable deployment
- ✓ Browser-based configuration for simple installation and adjustments
- ✓ Works on local networks – no internet connection required

Easy Setup   **Customizable**   **Scalable**

Build a smarter, connected kitchen.

Elo designs interactive solutions to unite front- and back-of-house operations within a single, unified hardware platform—including POS, self-service, and tableside ordering. With TrueOrder KDS on Elo devices, restaurants gain a reliable, easy-to-use kitchen display system that seamlessly integrates into existing workflows.

How to order.

Elo + Epson TrueOrder KDS is available through distribution in two configurations: on the I-Series AiO touch computer or the Backpack mini-PC, which can be paired with the monitor of your choice.
